PROFILE

Ambitious .NET student at Chas Academy with a focus on clean code, well planned architecture and Agile work. Proven track record of leading development teams and representing peer interests at the board level. Passionate about building robust, secure, maintainable, and scalable software.

EDUCATION

Fullstack Developer in .NET & C# June 2027
Chas Academy, Stockholm

Foundational C# July 2025
Microsoft Learn & FreeCodeCamp

SKILLS

- Communication / Teamwork
- GIT / GitHub
- Scrum / Kanban
- Agile methods
- C# / .NET
- JS
- HTML / CSS
- SSMS / T-SQL
- More to come as education proceeds

WORK EXPERIENCE

Team Manager & Fullstack Developer 2025
Lords Of Arda (Collaborative Project), Stockholm

- Led a team of 5–7 developers through the intensive development phase of a text-based RPG, managing the transition from concept to functional demo.
- Facilitated Agile ceremonies, including weekly retrospectives and standups, to maintain team velocity and ensure alignment between the Scrum Master and the development team.
- Contributed as a fullstack developer in a shared codebase, managing Git workflows, code reviews, and resolving complex merge conflicts to maintain repository health.

Class Representative 2025 - Present
Chas Academy, Stockholm

- Elected spokesperson for the NET25 class, acting as the primary liaison between students and the board of education.
- Collaborating with industry representatives to ensure the curriculum remains aligned with current .NET framework trends and recruiter requirements.

Developer & Creator

2024 - Present

The seer, GitHub / independent project

- Re-engineered a legacy single-loop program into professional N-tier architecture using OOP principles, demonstrating a deep understanding of separation of concerns and maintainable software design.
- Implemented a Code First approach with Entity Framework Core for data persistence (3NF) and integrated a secure authentication system using PBKDF2 hashing for user-specific data and journaling.
- Managed the full development lifecycle by utilizing UML and ER diagrams to ensure structural integrity and normalized database schemas before implementation, showcasing a disciplined approach to professional development.
